

IN THE CLAIMS

1. (Canceled)

2. (Canceled)

3. (Canceled)

4. (Canceled)

5. (Canceled)

6. (Canceled)

7. (Currently Amended) ~~A rack mount server~~ An apparatus comprising:
[an] a rack-mount server enclosure having a front portion face; and
a display device having a movable coupling ball and socket joint attached within
the enclosure, to tiltably attach an end a back of the display device within the enclosure
and enable viewing of the display device at multiple angles relative to the front portion
face.

8. (Currently Amended) ~~The rack mount server~~ apparatus of claim 7,
wherein the movable coupling ball and socket joint is indexed to allow incremental
adjustment of the tiltably attached display device.

9. (Currently Amended) The ~~rack mount server~~ apparatus of claim 7 wherein the display device comprises an LCD.

10. (Canceled)

11. (Canceled)

12. (Canceled)

13. (Currently Amended) The ~~rack mount server~~ apparatus of claim 7 further comprising a securing mechanism to lock the display device at a position.

14. (Currently Amended) A rack mount appliance, comprising:
a ~~movable coupling ball and socket joint coupled~~ within the rack mount appliance; and

a display device, having a back end attached to the movable coupling ball and socket joint, to integrate an embed the back end of the display device within the rack mount appliance and tiltably attach the display device with the rack mount appliance and enable tilting of the display device.

15. (Canceled)

16. (Canceled)

17. (Currently Amended) The rack mount appliance of claim 14 wherein the ~~movable coupling ball and socket joint~~ has a securing mechanism to lock a display position of the display device.

18. (Currently Amended) A rack mount server ~~with~~ having an integrated display device ~~having, wherein~~ an end of the display device is coupled within the rack mount server via a ball and socket joint, to provide ~~an~~ a tiltably adjustable viewing angle for the display device.

19. (Currently Amended) The rack mount appliance of claim 14, wherein the attached display device has at least two degrees of freedom of position adjustment.

20. (New) The rack mount appliance of claim 14 wherein the ball and socket joint is indexed to allow incremental adjustment of the display device.

21. (New) The rack mount appliance of claim 14 wherein the display device comprises an LCD.

22. (New) The rack mount server of claim 18 further comprising a securing mechanism to lock the display device at a position.

23. (New) The rack mount server of claim 18 wherein the ball and socket joint is indexed to allow incremental adjustment of the display device.

Blunt

24. (New) The rack mount server of claim 18 wherein the display device comprises an LCD.
